ABOUT US

At Astris Lifecare we have a specialist, passionate team and trained consultants who understand the unique needs of the Aged Care sector. We assist you in meeting the facility equipment needs of your residents so they are given the dignity, respect and care that they are entitled to. We provide equipment solutions to ensure that the facility work environment is kept safe, productive and compliant to meet the challenges and changing nature of the aged care community. Our team will support you throughout your facility refurbishment, fit out or new-build to ensure your unique vision for your residents are realised, exceeded, and impressions are lasting.

We focus on many aspects of aged care including respite, dementia specific care, palliative care and other additional services. Astris Lifecare continually invests in Aged Care products, our company infrastructure, our people and future planning to help contribute to the aging Australian population.

Our extensive and innovative product range of global and national brands include aged care beds, pressure management and pain relief products, lifting and manual handling solutions, bathroom safety, mobility products, healthcare furniture and seating, facility service equipment, mobility and hygiene products and much more.

Try the Astris Aged Care experience today!

FACILITY INSTALLATIONS & FIT OUTS

From single products to complete room fit-outs, Astris Lifecare can cater to all your facility needs.

The aged care industry is our specialty and we have a wealth of knowledge and experience to cater to the needs of all aged care facilities. Whether you are looking for a single product or a complete room fit-out, Astris Lifecare can provide all the equipment to fulfil your needs.

Ensuring an efficient fit-out requires a good team with impeccable communication and organisation skills. The Astris product specialist and customer service teams work seamlessly together to achieve a smooth operation from start to finish and make it effortless for facility managers and residents.

With over 50 years of experience you can be sure that our products and equipment will be installed correctly to the detailed specifications with all safety measurements in places. Our expert approach will save you administration time, money, and avoid any needless disruptions.

BEDS & Bedroom accessories

BD0530 Eurocare Wattle Home Care Bed

The Wattle Bed is an optimal bed solution for nursing care environments. Designed around principles of comfort and safety, the bed has many additional features including the benefits of a high/low function that reduces the risk of falls and minimises the needs of restraints. The Wattle Bed is a stylish, practical and long-term solution which offers safety, stability and longevity for the client.

Features:

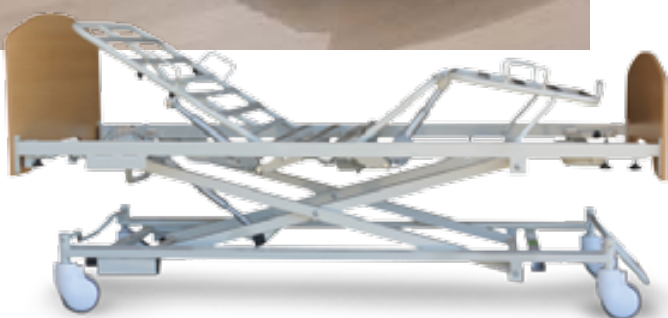

- Electric high
- Electric backrest
- Electric kneebend
- Vertical lift action
- Central locking castors
- In built 200mm length extension
- Battery back up
- Removable head and foot boards
- 125mm castors
- Minimum height 310mm
- Maximum height 755mm
- Safe working load 180kg

Models Available:

- BD0530 - Single
880mm x 1980mm
- BD0550 - King Single
1050mm x 1980mm

Accessories Available:

- Horizontal Side Rails (set)
- Self Help Pole
- Clamp on Rail

BD1350 Endless Floorbed

We are proud to introduce the first ever universal bed that suits low care, high care and bariatric care. Plus, this innovative three-in-one bed has a low height of 100mm and NO TOWERS!

From care of frail elderly or dementia patients, through to acute and bariatric settings, the patent pending Australian made BD1350 Endless Bed has you covered. One bed, endless possibilities!

Features:

- Unique dual Safe Working Load of 200kg or 300kg - simply swap handsets
- Low height of 100 and high height of 725mm
- No towers. Up to 400mm shorter than other floor level beds
- Universal solution for Low, High & Bariatric care
- Chair position at the push of a button
- 10 year frame warranty & 5 year Linak warranty

Models Available:

- BD1350 - Single
- BD1360 - King Single
- Other sizes and Bariatric models available

Accessories Available:

- Side rails
- Battery Backup
- Dual Braking
- Custom design head and foot board options

BD0950 Wi-Bo Movita Bed

Many residents are forced to spend a large part of their time in bed. Regular mobilisation is extremely important here. This is supported by the divided side protections of the Movita bed. The divided side protections close seamlessly and, when applied at the head end, make an effective contribution to mobilisation in accordance with the expert standard, "Fall Prevention". Movita combines economic efficiency and cosiness with functional elements, thus ensuring an ambience worth living in. The dual retraction of backrest and leg rest creates space in the bed, helps to reduce pressure in the pelvic area and reduces friction and shearing forces.

The Wi-Bo Movita bed offers electric high low, electric backrest and kneebend. Known for its ambient non-institutional appearance the Movita's other features include:

- Double retracting sleeping surface to reduce friction and shearing forces. Also has been proven to aid in meal digestion
- Vertical raise therefore no holes in walls, not scissor action
- Underbed clearance for mobile patient lifters at any position
- Easy access foot pedals
- Handset lockout function so care staff have control in dementia care setting
- Robust hand control with 2 button operation reducing risk of accidental bed adjustment
- 125mm central locking castors (time saving for care staff)
- 2000mm sleeping surface equipped with integrated 200mm bed extension (just requires extension in-fill and foam bolster to close gap)
- 3 year electrical / 10 year warranty compliance with new standard IEC 60601-2-52
- Choice of different wood grain finishes
- Quality German made construction
- Less space taken up by bed compared to traditional beds that do not have vertical lift (move in an arc)
- Minimal gap between edge of mattress surface and sideguard

BD0690 Wi-Bo Sentida Bed

The Sentida low nursing bed reduces the risk of falls and their often serious consequences, thanks to its low surface height and sophisticated side guard concept. This notably increases safety at night, especially for active patients. The requirements of the current "fall prophylaxis" expert standard are completely complied with. Low nursing beds from the Sentida series offer a wide range of technically advanced functions and elegant design. Patient safety is a top priority. The strain placed on nursing staff is considerably reduced.

The Sentida bed has electric high low, electric backrest, electric kneebend and trendelenberg. With the ability to lower this bed to within 25cm from the floor it is the ideal model for a dementia/high falls risk application.

Known for its ambient non-institutional appearance the Sentida's other features include:

- Maximum height of 80cm reducing risk of back strain
- Compliance with new standard IEC 60601-2-52
- Excellent brake design - braking function on handset as well as head and foot end brake bar
- Great movability even in a confined space due to 4 double castors at both bed ends
- Minimal gap between edge of mattress surface and side guard
- Double retracting sleeping surface to reduce friction and shearing forces
- Also aids in relief of pressure in sacral area
- Unique comfort seating position to make patient breathing easier, as well as digestion
- Vertical raise therefore no risk of holes in walls behind the bed
- Underbed clearance for patient lifters at any position
- Handset lockout function so care staff have control in dementia care setting
- Pre-selection function on handset to avoid accidental adjustments
- Equipped with integrated 20cm bed extension (just require extension in-fill and foam bolster to close gap)
- Attractive wood stain appearance
- 3 year electrical / 10 year frame warranty
- Quality German made construction
- Limitless safety options and accessories

BEDS & Bedroom accessories

BD1260 Latera Thema

Latera Thema Palliative Care Turning, Repositioning, Reclining Patient Support System. Another product for the Wissner-Bosserhoff range, the Latera Thema was designed after extensive research exposed the need for a system with lateral tilting and reclining that could still be cost-effective. With the Latera Thema this was achieved! Whilst this model offers a host of functions it also has the non-institutional appearance.

Benefits Include:

- Fully functional seating and reclining positions
- Painful friction forces during positioning are reduced
- Significantly reduces stress to care staff when performing clothing changes, wound dressing etc..
- A handset for patient (does not have turning function) and an additional handset for care staff
- Double retracting sleeping surface to reduce friction and shearing forces
- Vertical raise therefore no holes in walls, not scissor action
- Underbed clearance for mobile patient lifters at any position
- 2000mm sleeping surface equipped with integrated 2000mm bed extension (just requires extensions in-fill and foam bolster to close gap)
- Easy access foot pedals
- Hand control has nurse lockout for dementia residents
- Robust hand control with 2 button operation reducing risk of accidental adjustment
- Compliance with new standard IEC 60601-2-52
- Quality German made construction
- Please note that this bed is available in a variety of wood-stain decor colours. Request a free sample.

BD0570 CS-7 Electrical Bed

The CS-7 Electrical Bed is a truly versatile bed. Lowering to a height of 17cm's off the ground, it is a hi-lo bed combined with floor level benefits, making this a completely unique aged care bed, suitable for a variety of residents and their specific needs.

Features:

- Auto-Contour that simultaneously raises both head and knees assists in comfort and positioning, but also helps reduce painful skin shearing
- Height adjustable between 17-75cm, lowering to 17cm from the floor, the CS7 is low enough to the floor to help minimise injuries sustained when falling out of bed
- Tough and durable hand control pendant using a rugged, water-resistant pendant with fewer recessed areas is easy to clean and very intuitive for the resident to use
- Centrally locked rear castors
- Tool-less assembly and Fast connect system

Accessories Available:

- Bed ends available in Amherst (Solar Oak) or Drake (Biltmore Cherry)
- Custom timber surrounds are also available.
- Accessories include metal side rails, self help pole and assist bar
- Pan deck is available
- Range of mattresses available to suit individual care needs

EE0200 Litavo

The ideal aid while reading or eating a meal, both in bed and chair. The tabletop can be adjusted continuously and is equipped with a tiltable part that can be used to read on.

Base:

- Firmly welded U-shaped frame
- The high/low column consists of 2 aluminium profiles and can be telescopically adjusted in height by means of a gas spring
- The column can be installed at the left or right side, depending on the customer's wishes.
- The gas spring is activated by means of a lever near the fixed tabletop and guarantees a continuous height adjustment of circa 69cm-99cm
- The U-shaped base can be optionally equipped with two stainless steel protection caps
- The metal support is protected with an epoxy-coating
- The aluminium parts are protected by an anodised layer
- Equipped with 4 design castors Ø 65 mm, two of which have brakes

Table Top:

- The tabletop consists of a fixed and a tiltable part. Both parts are equipped with an upright synthetic edge
- The tiltable part is supported by an aluminium profile
- The tabletop can be tilted in 2 positions: 22,5° and 45°
- The tabletop is tilted by means of an easily accessible lever on the outside
- The tabletop is made of solid laminate, thickness 8 mm

BC0160 Eurocare Crash Mat

Features:

- Seam sealed for infection control
- Reflective strip to reduce trip hazard
- Folding for easy storage
- Vinyl waterproof cover
- Supplied with a warning sign for 'Trip Hazard'

EE0080 Overbed Table

- Lightweight mobile table
- Suitable to use over the bed or chair
- Ideal to use while eating and for other household activities
- Adjustable height and angle
- Soft raised lip edge helps prevent items from slipping off table top
- Wide base for greater stability
- U shape base enables the table to be positioned closer to the chair and the user
- Fitted with four swivel castors, two of which are locking
- Disassembles for storage and transportation
- Powder coated steel frame

- Table Width: 810mm
- Table Depth: 450mm
- Table Height: 685-1000mm
- Base Width (Inner): 735mm

EE0060 Overbed Table Spring Loaded

- Lightweight mobile table
- Suitable to use over the bed or chair
- Ideal to use while eating and for other household activities
- Adjustable height
- Spring loaded mechanism is quick and easy to operate, making it ideal for multiple clients, and multiple activity use
- Soft raised lip edge helps prevent items from slipping off table top
- Wide base for greater stability
- U shape base enables the table to be positioned closer to the chair and the user
- Fitted with four swivel castors, two of which are locking
- Disassembles for storage and transportation
- Powder coated steel frame

- Table Width: 810mm
- Table Depth: 450mm
- Table Height: 720-1080mm
- Base Width (Inner): 725mm

EE0180 Viva Overbed Table

- Suitable to use over the bed or chair
- Seamless one piece moulded ABS plastic top with no gaps/hollows underneath
- Soft raised lip edge helps prevent items from slipping off table top
- Height adjustable by gas assisted mechanism to allow the table to be easily positioned with one hand at any height within the range.
- Modern, attractive looking Aluminium column design
- Wide base for greater stability
- U shape base enables the table to be positioned closer to the chair and the use
- Fitted with four swivel castors, two of which are locking
- Robust design ensures a long life span in the demanding Hospital environment

- PE easy clean top, 34mm deep, max 20kg load
- Dimensions: 900mm w x 430mm deep
- Height adjustment 725-1050mm
- 4 Castors, inc 2 locking

Bedside Cabinet

- Timbergrain melamine construction
- Solid european beech timber legs
- 3 drawers, top locking
- Deep bottom drawer
- Polished with a 2 pack lacquer
- Choice of colours and sizes available
- Width: 540mm
- Depth: 460mm
- Height: 750mm

Wardrobe

- Timbergrain melamine construction
- Solid european beech timber legs
- 2 Doors (also available in 1 door style)
- Internal hat shelf and hanging rail
- Polished with a 2 pack lacquer
- Choice of colours and sizes available
- Width: 900mm
- Depth: 500mm
- Height: 1800mm

Bedside Cabinet

- Timbergrain melamine construction
- Top with front radius corners for aged care safety
- 3 drawer, top locking
- Deep bottom drawer
- Plinth base
- Choice of colours and sizes available
- Width: 540mm
- Depth: 460mm
- Height: 750mm

Wardrobe

- Timbergrain melamine construction
- 1 Door style (also available in 2 door style)
- Internal hat shelf and hanging rail
- Plinth base
- Choice of colours and sizes available
- Width: 500mm
- Depth: 500mm
- Height: 1800mm

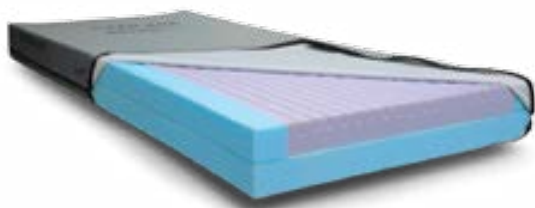

PRESSURE CARE

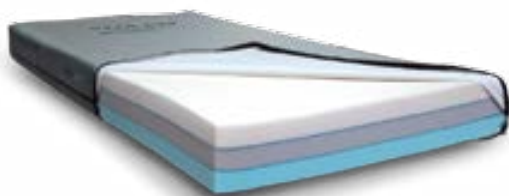

MF0280 Eurocare Dynamic Mattress

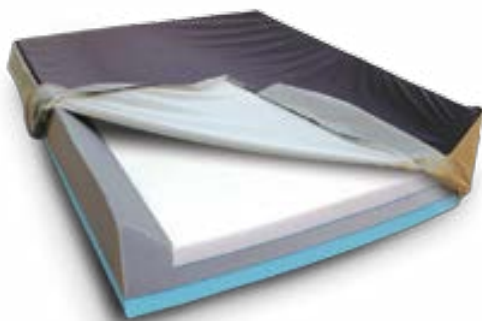

- Pressure relieving foam
- Size: 1980 x 870 x 150mm
- Adaptive cubic system that contours to the body shape
- Provides pressure reduction and patient comfort
- Side zone reinforcement
- Mattress does not require turning
- 2 way stretch cover
- Waterproof cover
- Fire retardant cover
- Maximum user weight 170kg
- Made in Australia
- Various sizes available

MF0090 Eurocare 3Core Foam Mattress

- Pressure relieving foam
- Size: 1980 x 870 x 150mm
- 3 layers of foam
- Visco-elastic top layer of foam
- Side Form Reinforcements
- Economically provides pressure redistribution across a large area of the body
- 2 way stretch cover
- Waterproof cover
- Fire retardant cover
- Maximum user weight 170kg
- Made in Australia
- Various sizes available

MF0060 Eurocare 3Core Concave Mattress

- Pressure relieving foam
- Size: 1980 x 870 x 150mm
- 3 layers of foam
- Visco-elastic top layer of foam
- Concave sides for patient safety
- Economically provides pressure redistribution across a large area of the body
- 2 way stretch cover
- Waterproof cover
- Fire retardant cover
- Maximum user weight 170kg
- Custom sizes are available
- Medium Risk Pressure Care Rating
- Various sizes available

MA0090 Oska Area Self Adjusting Pumpless Air Mattress

- Pressure redistribution air/foam mattress
- Prevention and treatment up to and including category 3(1)
- Recommended user weight: 0-230 kg
- Warranty: 5 years
- Cleaning of cover: Wipe with cleaning agent and/or disinfectants.
- Machine wash max 95 °C, tumble drying.
- Fire retardant cover
- Easy to handle and maintain
- Flexible and self-adjusting
- Handle for transportation
- Hygienic cover with welded seams
- Integrated heel function
- Non-powered mattress replacement system
- Reinforced sides for improved lateral stability
- Unique markings on the mattress and cover
- 2000mm x 850mm x 180mm
- Various sizes available

MF0440 Oska Optimal 5zon

- Pressure: Highly elastic, high-quality material and a unique zone and module system gives effective pressure equalisation
- Shear forces: The mattress is specially designed to minimise the effects of shear forces
- Sit function: Our patented sit function DuoCore® is designed to give support when sitting and also to provide good comfort when lying
- Moisture: The hygienic cover is vapour permeable, which reduces the risk of skin maceration
- Core: HR-foam 65+50 kg/m³
- Height: 14 cm
- Function: Prevention and treatment up to and including category 2(1) Recommended user weight: 0-150 kg
- Fire: EN 597-1, -2
- Warranty: 3 years
- Cleaning of cover: Wipe with cleaning agent and/or disinfectants. Machine wash max 95°C, tumble drying

MA0390 Oska Sam Single

- Type: Static air mattress
- Height: 10 cm
- Function: Prevention and treatment up to and including category 2(1)
- Recommended user weight: 0-200 kg
- Power supply: 230 V/50 Hz
- Warranty: 2 years
- Cleaning of cover: Wipe with cleaning agent and/or disinfectants
- Machine wash max 95 °C, tumble drying
- CPR function – rapid deflation
- Easy to handle and maintain
- Elastic fastening band
- Silent and energy-efficient pump
- Soft, elastic, vapour permeable hygienic cover
- Unique labelling
- Very good cleaning properties

MA0340 Oska Sam Bas Single

- Type: Static air mattress
- Height: 16 cm
- Function: Prevention and treatment up to and including category 2(1)
- Recommended user weight: 0-200 kg
- Fire: EN 597-1, -2
- Power supply: 230 V/50 Hz
- Warranty: 2 years
- Cleaning of cover: Wipe with cleaning agent and/or disinfectants
- Machine wash max 95 °C, tumble drying
- CPR function – rapid deflation
- Easy to handle and maintain
- Extra soft inner cover
- Heel function
- Silent and energy-efficient pump
- Soft, elastic, vapour permeable hygienic cover
- Unique labelling
- Very good cleaning properties

MA0150 Oska Cirrus Single

- Type: Alternating pressure mattress
- Height: 21 cm
- Function: Prevention and treatment up to and including category 4(1)
- Recommended user weight: 0-180 kg (cat. 4) & 180-230 kg (cat. 2)
- Fire: EN 597-1, -2
- Power supply: 230 V/50 Hz
- Noise level of pump: 27 dBA
- Machine wash max 95 °C, tumble drying
- Alternating pressure on soft foam surface
- Easy handling and cleaning
- Heel slope, for pressure relief of heels
- Rapid deflation of the mattress
- Silent and energy-saving pump
- Soft, elastic, vapour permeable hygienic cover
- Sound and light alarm
- Static function with automatic return

MA0440 Harvest Opal Overlay

The Opal system is an alternating overlay mattress system for the prevention and treatment of pressure ulcers in medium risk patients and is ideal for both community and home care environments.

- Size: 1980 x 880 x 110mm
- Alternating Overlay System
- Suitable for Medium Risk patients
- Manual pressure control functions
- Visual low pressure indicator
- Low running costs
- Quiet pump operation
- CPR Facility

MA0460 Harvest Salisbury

The Harvest Salisbury Overlay is an alternating pressure relief air mattress overlay system for patients at high risk of developing pressure sores. This system has a waterproof, vapour permeable two way stretch cover and is powered by the popular Uni Pump. The cover is printed to show cleaning instructions and enable easy identification of the system.

- Size: 1980 x 850 x 130mm
- Alternating Overlay System
- Suitable for High Risk patients
- Manual pressure control functions
- Visual low pressure indicator
- Low running costs
- Quiet pump operation
- CPR Facility
- Removeable Cell Structure
- Transport Mode as standard
- Overall Width: 850mm
- Overall Height: 130mm
- Overall Length: 1980mm
- Cycle Time: 10 minutes
- Maximum user weight 152kg

MA0310 Harvest Supreme Overlay

The Supreme system is an alternating overlay air mattress for the prevention and treatment of pressure ulcers in high risk patients. The system works on a proven alternating principle resulting in maximum patient comfort whilst achieving optimum pressure relief.

A cost-effective solution for hospitals as well as hospices, nursing and care home environments.

- Size: 1980 x 850 x 130mm
- Alternating Air Overlay System
- Suitable for High Risk patients
- Static option
- Single button controls
- Visual low pressure indicator
- Audible mains failure alarm
- Quiet operation
- CPR Facility

MA0450 - Harvest Opal Plus

The Harvest Opal Plus Replacement Mattress System is a cost effective solution comprising of an alternating overlay mattress on a foam base suitable for the prevention and treatment of pressure ulcers in patients at high risk. The cover has a double compartment to separate the air cells from the base. The foam will accommodate fully profiling beds.

The Opal Plus is ideal for use in hospitals, hospices, nursing homes and many other care giving institutions where residents or patients need a high level of comfort and pressure relief.

- Size: 1980 x 900 x 150mm
- Replacement Mattress System
- Suitable for High Risk patients
- Manual pressure control functions
- Visual low pressure indicator
- Low running costs
- Quiet pump operation
- CPR Facility
- Overall Width: 900mm
- Overall Height: 150mm
- Overall Length: 1980mm
- Cycle Time: 10 minutes
- Maximum user weight 169kg

MA0230 Harvest Cavalier Alternating Air Mattress

The Harvest Cavalier alternating air mattress is a replacement alternating air system for the prevention and treatment of pressure ulcers in patients at high risk. These work on a proven alternating principle resulting in maximum patient comfort whilst achieving optimum pressure relief. A cost-effective solution for hospitals as well as hospices, nursing and care home environments.

- Size: 1980 x 880 x 200mm
- Alternating Replacement System
- Suitable for High Risk patients
- Static redistribution setting
- Single push button pressure control
- Guaranteed "zero interface" pressure
- Visual low pressure indicator
- Audible mains failure alarm
- Quiet operation
- CPR Facility
- Mechanical pump

MA0640 Steiss

- Advanced Digital dynamic Overlay Mattress System
- Static head cell section for greater patient comfort
- Multi stretch PU cover helping reduce shear and friction
- Premium all-round zipper for improved infection control
- 18 removable cells for easier cleaning and servicing
- External CPR design for fast emergency deflation
- Static mode with 30 minute auto return for safer patient transfers
- Acoustic and optical low pressure and power down alarms for added safety

- Auto-firm function provides faster static inflation for aiding nursing tasks
- External pump filters and fuses for easier maintenance
- Anti-kink tubing for added safety and reliability

MA0600 Steiss

- Advanced Digital Full Replacement System
- 1 in 4 active cycle for lower surface pressures and enhanced patient support
- Specialist narrow heel cells for targeted pressure care
- Multi stretch PU cover helping reduce shear and friction
- Premium all-round zipper for improved infection control
- 20 Quick-release full depth cells for easier cleaning and servicing

- External CPR design for fast emergency deflation
- Static mode with 30 minute auto return for backup protection
- Acoustic and optical low pressure and power down alarms for added safety
- Auto-firm function provides faster static inflation for aiding nursing tasks
- External pump filters and fuses for easier maintenance

MA0590 Steiss

- Adjustable digital control unit with 10, 20 or 30 min cycles for various patient scenarios
- Specialist narrow heel cells for targeted pressure care
- Multi stretch PU cover helping reduce shear and friction
- Premium all-round zipper for improved infection control
- 20 Quick-release full depth cells for easier cleaning and servicing
- External CPR design for fast emergency deflation
- Static mode with 30 minute auto return for safer patient transfers

- Acoustic and optical low pressure and power down alarms for added safety
- Auto-firm function provides faster static inflation for aiding nursing tasks
- External pump filters and fuses for easier maintenance
- Anti-kink tubing for added safety and reliability

ROHO Airlite Cushion

- Lightweight durable foam cushion with a sealed pre-set air support pad
- Ideal for persons requiring a lightweight, low maintenance cushion that provides comfort and support without the need of necessary adjustments
- Contoured foam provides stability and postural support for basic positioning needs
- Flotation support pad is sealed for protection and durability
- Supplied with a fluid resistant cover with a non slip base

Dimensions	Height	Max Weight
41 x 41cm	75mm	110kg
43 x 41cm	75mm	110kg
43 x 43cm	75mm	110kg
46 x 41cm	75mm	110kg
46 x 46cm	75mm	110kg
51 x 46cm	75mm	110kg

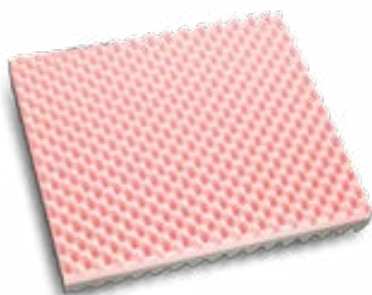

Relax Easy Cushion

- Combination of layers of viscoelastic foam and Fogel
- Fogel promotes even pressure distribution while foam moulds to body shape providing additional comfort
- Cushion is fully rotational making it ideal for situations where low maintenance is required
- Cover is non-slip, fluid resistant and easy to clean

Dimensions	Height	Max Weight
41 x 41cm	75mm	110kg
43 x 41cm	75mm	110kg
43 x 43cm	75mm	110kg
46 x 41cm	75mm	110kg
46 x 46cm	75mm	110kg
51 x 46cm	75mm	110kg

SAF Pink/Grey Cushion

- Gel permeated shock absorbent foam
- Open cell convoluted foam allows increased air circulation
- Lower density pink foam is laminated to a higher density grey foam
- Pink foam moulds to body shape to provide comfort and uniform pressure relief while grey foam provides stable support and positioning
- Bacteria free and machine washable (up to 95° C)
- Made in Denmark

Dimensions	Height	Max Weight
41 x 41cm	60mm	110kg
45 x 41cm	60mm	110kg
45 x 45cm	60mm	110kg
50 x 45cm	60mm	110kg
50 x 50cm	60mm	110kg

ROHO Mosaic Cushion

- Polyvinyl interconnected air cells
- Provides a comfortable and functional sitting environment
- Air pressure is adjustable and can be customised
- Breathable zippered lycra cover with a non slip base
- Supplied with a pump

Dimensions	Height	Max Weight
41 x 41cm	70mm	157kg
46 x 41cm	70mm	157kg
46 x 46cm	70mm	157kg

MC4960 The Evolution Cushion

- **Air-Foam Floatation** - The functional areas of the cushion are created by three types of foam; soft foam under the decubitus-sensitive area of the ITs; medium foam for the thigh trough, pelvic bucketing and pre-ischial bar; and firm foam to provide support through the perimeter and medial thigh separator
- **Positioning Supports** - Positioning supports improve stability, which is important for users with compromised sitting balance or who transfer frequently. Multi-stiffness foam provides support as the user is immersed in the cushion. Medial and lateral supports minimise internal and external lower extremity rotation. Pelvic bucketing and a pre-ischial ridge help maintain pelvic position, and thigh troughs promote a natural femoral position
- **Valve for Adjusting Air Volume** - The Evolution PSV uses Varilite's patented Pressure Setting Valve. The Evolution is also available with a traditional two-way Varilite valve
- **Cover** - The Evolution comes complete with either a mesh or incontinence cover made from a breathable two-way stretch fabric. Reticulated foam inside promotes air exchange and improves pressure redistribution. The Evolution cover is machine washable, tumble dryable and meets ISO 7176-16 ignition resistance standards for upholstered wheelchair components
- **Wedge** - A modifiable closed-cell foam wedge is available with each Evolution, to assist pressure redistribution from the sensitive ITs onto the thighs

Available Options:

- 45 x 40cm
- 45 x 45cm
- 50 x 45cm
- 55 x 45cm

ROHO Quadtro Cushion

- Cells are interconnected and their unique shape promote blood circulation to facilitate pressure prevention, healing and relief
- Flexible cells adapt to patient contours and reduce shear forces while transferring or repositioning
- As the body is immersed in the cushion, greater contact area is achieved for the dispersion of pressure, hence the pressure on any one area is minimised
- Low profile cells maximise stability and make transfers easier for the active client
- High profile cells allow greater depth immersion, providing a higher level of pressure care
- Air pressure is adjustable and can be customised
- After air pressure is adjusted, ISOFLO valve prevents air flow between quadrants, assisting the positioning and postural stability of the client
- Durable neoprene construction is soft to suit skin sensitivity, and is easily cleaned
- Breathable zippered lycra cover with a non-slip base
- Supplied with pump

a blessing for people needing care

Ergo-line versus Classic

Both Fero relax chairs are equipped with a specially designed recliner mechanism for use within the healthcare sector. They support all parts of the body while inclined in a “Zero-Gravity” position*.

- The Fero relax chair “Ergo-line” has a handle with similar function on both left and right sides of the chair. The handle is very easy to use in either a forward or backward direction. It can be put in an on/off position and will remain in that selected position. Whilst in the ON position, hands free movement allows an easy recline positioning. The seat, backrest, and legrest incline simultaneously and continuously until the “Zero-Gravity” position* is obtained.
- The Fero relax chair “Classic” can be easily adjusted by a light backwards push, without having to manipulate a handle. With this chair, the legrest moves upwards first, after which the whole seat can be inclined. Exactly like the synchro driven mechanism, any new position requires hardly any effort.

Comfort

The Fero relax chair has been especially designed for those in need of that extra special care to which comfortable seating is of paramount importance. These chairs will allow the patient to feel exceptionally well-supported. In the various seating positions, the pressure of the body and the position of the limbs in relation to one another are taken into account. This produces less resistance and more comfort. With every change in position, the small of the back remains fully supported due to this ingenious mechanism. The complete support of the lower legs helps in the reduction of knee joints pressure as soon as the mechanism of the relax chair is activated. Moreover, in the “Zero-Gravity” position* the active pressure on the knees is negligible and pillows for back knee support are now superfluous to requirements. Finally, the adjustable neck cushion provides optimal support for neck and head.

Circulation and Respiration

Patients, particularly the elderly, often suffer from circulatory and respiratory disorders like arteriosclerosis, atheromatosis, venous ulcers, diabetes foot, cardiac insufficiency, pulmonary problems like emphysema, decreased lung capacity, etc. With a simple adjustment of our relax chair, positions can be easily changed, affecting the perfusion-ventilation ratio of the lungs with every change. The lung alveoli are stimulated resulting in a higher production of surfactants keeping the alveoli elastic and allowing a better oxygenation of the blood.

The changes in seating position, particularly the “Zero-Gravity” position*, ensure a stress-reduced blood circulation. Since legs and heart are almost on the same level, there is less build-up of venous pressure in the lower limbs. Consequently the legs feel less tired and in turn improve the healing process of possible chronic leg sores.

* “Zero-Gravity” position: This sitting/lying position is inspired by NASA data on a neutral physical position, which transforms all muscular strength into a biomedical equilibrium.

Pressure Reduction

The synchronized adjustment of the seat, backrest and legrest prevents “sliding” forward, and avoids unwanted pressure on the coccyx. The variation in density of the seat and backrest foam provides pressure distribution and also helps minimize the above-mentioned sliding movement. Pronounced inclination of the seat in the “Zero-Gravity” position* gives optimum support to the body and results in a marked decline in pressure related injuries.

Getting up

Moving from a sitting to a standing position is particularly patient-friendly with the Fero chair. The seat is high and the legrest folds back sufficiently to allow the feet to be placed well back to start an optimal standing movement. The wide and long armrests provide extra support when necessary.

Functionality

There are so many accessories that can be accommodated by our Fero chair collection including an anatomical reductor, extra locking, IV rod, detachable headrests, upholstered armrests, seats in viscoelastic foam, etc., all of which extend the possibilities of application.

Both seat types can also be fitted with a synthetic dinner tray that is light weight, strong, shock-resistant and easy to attach.

A wooden armchair with white upholstery is the central focus of the image. The chair has a high, curved backrest with a horizontal cushion, a wide seat, and a matching ottoman. The wooden frame is made of a light-colored wood with a smooth finish. The chair is positioned in a room with a light-colored wooden floor. In the background, there is a wall with three framed pictures: a large one with a silhouette and two smaller ones. A large, round, metallic pendant light hangs above the chair. To the left, there is a window with sheer curtains and a dark leather ottoman with books on it. A small, dark, shaggy rug is visible in the bottom left corner.

Safe working load: 300 kg

Bariatric Fero

The Fero Bariatric chair is a very comfortable chair that has been especially developed for bariatric patients. The electrically tiltable backrest and the high-quality upholstery materials guarantee an optimal comfort when the patient wants to sit down for a long time. The lowerable armrests make it possible to transfer the patient very easily. The Integral design castors are equipped with a central brake mechanism, which enables the staff to move the patient without any problems. Furthermore, the chair has been designed in such a way that it does not contrast with a modern care chair.

Airwing Chair

- Power lift and recline armchair
- Patented airbag system provides optimum comfort and pressure relief in backrest, seat and legrest
- Overfilled back provides increased lumbar support
- Polished timber arm knuckles assist transfers
- Supplied with magazine pocket
- Hand held controller is easy to use
- Recline or rise motion stops at any point when button is released
- Wall saver mechanism requires minimal clearance behind the chair when reclined
- Made in Australia

ED1950 Daily Chair Bed

- Memory Foam seating for added patient comfort
- Gas operated seat tilt, back recline and adjustable leg rest for improved patient positioning
- Adjustable arms and wings for improved patient access
- Removable/adjustable headrest cushion
- Multi-stretch PU seating upholstery
- Tough and durable steal framework for easy maintenance
- Locking and directional castors for easy manoeuvrability.
- Maximum static user weight capacity - 180kg
- Suits patients from 162cm (5'4") to 188cm (6'2")
- Seat Width: 510mm
- Arm Height: 170mm
- Back Height: 710mm
- Overall Width: 690mm
- Max User Weight: 180kg

BD1340 Deluxe Chair-Bed

- Mobile reclining patient chair
- Ideal for dependant patients who are confined to a chair for long periods
- Unique total surface air pressure system (in backrest, seat and legrest) provides proven pressure relief
- Adjustable seat, backrest and legrest angles provide multiple seating and sleeping positions
- Adjustable and drop-down wings and armrests for easy side patient transfers
- Detachable and adjustable headrest pad for additional comfort
- Push handle and simple recline mechanism makes movement and operation safe and easy for the carer
- Soft-stretch vinyl is used on inner contact surfaces, while hard-wearing vinyls are used on the outside of the chair
- Easy to clean and maintain
- NEW transport tie down points
- NEW shaped base allowing an anterior tilted seat for standing pivot transfer
- 4 x 150mm swivel locking castors (one directional) for easier mobility
- Made in Australia

Specifications:

- Seat Width: 510mm
- Arm Height: 170mm
- Back Height: 710mm
- Overall Width: 690mm
- Max User Weight: 180kg

ED1960 Shoalhaven Chair-Bed

- Mobile reclining patient chair
- Ideal for dependant clients who are confined to a chair for long periods
- Pressure-sensitive foam, shaped backrest with lumbar and lateral support, angled arm pads and adjustable/removable wings and neck support ensure maximum comfort and postural support
- Integrated aircell in seat for premium pressure relief
- Large push handle and simple recline mechanism makes movement and operation safe and easy for the carer
- Soft-stretch vinyl is used on inner contact surfaces, while hard-wearing vinyls are used on the outside of the chair
- Armrest bumpers provide additional protection to the armrests and upholstery
- 4 x swivel locking castors (one directional) for easier mobility
- Made in Australia

- Seat Width: 520mm
- Arm Height: 220mm
- Back Height: 750mm
- Overall Width: 770mm
- Max User Weight: 135kg

Options Available:

- Tray - Removable, slide in
- Shoalhaven Chair Electric – Battery operated mechanism

Domus Classic Flex

The central idea behind the Domus relax chair is to offer optimal seating comfort in peace and quiet.

The Classic mechanism can be easily adjusted by pushing yourself off. Lever manipulations belong to the past.

Support:

- The rounded sides consist of 2 OSB boards of 18 mm, and are firmly connected with a metal structure
- The sides are upholstered with fire-retardant foam
- The upholstery is finished with imitation leather and decorative stitching
- Comfortable rounded armrests of ± 5 cm
- All edges and corners have been rounded
- No visible fastening elements
- Design castors $\varnothing 65$ mm with brake
- Optionally possible on solid beech legs, with aid castors at the back

Seat:

- Removable seat in melaminated MDF, thickness: 12 mm
- The rounded seat in front stimulates a fluent blood circulation
- Comfortable seat height of 45 cm
- Upholstered with fire-retardant foam. Two different density zones guarantee optimal seating comfort
- The upholstery is finished with imitation leather and decorative stitching

Leg Rest:

- Plywood, thickness: 10 mm
- Upholstered with fire-retardant foam and finished with imitation leather

Back Rest:

- The backrest consists of an ergonomic pre-shaped plywood shell, thickness 12 mm
- Upholstered with fire-retardant foam. This foam has 3 different density zones to guarantee optimal seating comfort
- The upholstery is finished with imitation leather and decorative stitching
- Equipped with an adjustable and removable head/neck cushion

Adjustable positions:

- 2 positions: seating position and relax position
- The relax mechanism first raises the legs, after which it is possible to further incline the entire chair
- Easy to adjust by pushing yourself off
- Adjustable without lever manipulation
- Optimal seating comfort in each position, thanks to the constant angle between the backrest and seat during the inclination
- Optimal leg support, thanks to the telescopic legrest
- In the seating position, the legrest is turned inward to make it easier to get up

wheelchairs

NB0130 AR Poirier Lever Drive Wheelchair

- Swingaway removable legrests and swingback removable desk arms
- Lever drive mechanism is used to propel wheelchair with a push-forward, pull-back motion by one hand
- Gear lever allows forward or reverse propulsion
- Drive mechanism is available on the left or right side
- Easily steered by turning drive lever
- Drive lever causes braking mechanism to function by pulling back against the rear wheel
- Durable vinyl upholstery
- Quality chromed steel folding frame Models

Under Bed Clearance:	130mm
Minimum Height Lift Arm:	880mm
Maximum Height Lift Arm:	1685mm
Under Base Height:	55mm
Lifter Weight:	51kg
Minimum Storage Height:	1190mm
Footplate:	Removable
Kneepad:	Height Adjustable

General Purpose Slings

Allegro General Purpose Slings are designed to be simple and safe to use for both home and institutional patient lifting.

The slings are manufactured from polyester fabric or mesh (suitable for bathing) with internal padding in pressure areas and utilise webbing attachment loops. The webbing loops are colour coded for sizing to allow easy sling selection and identification.

Webbing loops of varying lengths are provided at each connection point to allow a lay back posture for the patient or, by using the shortest loops, a higher lift.

General Purpose Slings may only be applied to lifting hoists fitted with a yoke attachment.

General Purpose Sling

Options Available:

- Provides easy fitting and good support for patients with some upper body control
- Recommended for general lifting

FABRIC	XS	S	M	L	XL	XXL
MESH	XS	S	M	L	XL	XXL

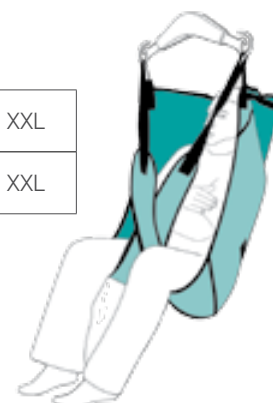

General Purpose Sling with head support

Options Available:

- Sling is easily fitted to a patient in bed or a chair, providing excellent upper body and head support
- Recommended for lifting from the floor and general lifting of the less secure patient

FABRIC	XS	S	M	L	XL	XXL
MESH	XS	S	M	L	XL	XXL

Standing Transfer Sling

The Standing Transfer sling is designed to support a weight bearing yet less than able person from waist level to mid shoulder whilst allowing free movement of the arms. The patient's hands can reach naturally to grip the lift arms as the patient rises. The Standing Transfer sling will provide adequate support for the patient who requires only minimal assistance for standing.

A Torso Belt provides added security and prevents the sling from riding up the patient's back when maximum support is required. The sling has the option of both Key-Hole fastening or Loop type attachments. This adds to the versatility of the sling in any environment.

Standing Transfer Sling

Options Available:

- Sling provides easy removal of clothing for toilet transfers
- Recommended on standing hoists for weight bearing patients only
- Available with Key-Hole and Loop type attachments

KEY-HOLE ATTACHMENT	M	L	XL
LOOP TYPE ATTACHMENT	M	L	XL

LB0450 Romedic ReTurn

- A multi-functional, pivoting & transportation platform that eliminates heavy lifting procedures
- Provides a secure and active transfer method when the client has to stand up and be moved to a bed, wheelchair or toilet
- Can also be used to test and exercise weight bearing capability, and assist in helping clients sit further back into a chair
- Ideal tool in a rehab unit, hospital ward or home because the client can manage transfers with the help of just one carer
- Place the platform close to the sitting client and place the client's feet on the base plate. The client can then get close to the vertically-spaced gripping bars and rise to a standing position using natural movements. The platform can then be steered towards desired location using the carer as a counterbalance
- Romedic Return Belt is an excellent complement to the Return when additional support and stability is needed
- The spacing of the gripping bars provides multiple grip and hand placement options for the client in sit-to-stand scenarios
- Lower leg supports are height and width adjustable to suit the individual needs of each client
- Base plate has an in-step of only 4cm so the client does not have to lift their feet very high to stand on to the platform
- Rolls and steers easily even with a heavy user
- Sturdy brake locking system for additional stability and security
- Disassembles into two parts for easy transportation

• Frame Height:	115mm
• Frame Width:	57cm
• Base Width:	37mm
• Base Length:	69cm
• Max User Weight:	150kg

LB0380 Walking Belt

- Assists the carer in patient mobility and transfers
- Reduces the risk of strain or back injury for the carer and user
- Double sided velcro fastener increases security and support
- Four large padded vertical handles assist the carer in supporting the client while walking
- Machine washable
- Available in 4 Sizes

Code	Size	Colour	Chest/Waist Circumference
LB0680	Small	Red	69-93cm
LB0710	Medium	Yellow	58-110cm
LB0700	Large	Green	90-117cm
LB0670	Extra Large	Blue	108-133cm

501P Padded Walking Belt

- Assists the carer in patient mobility and transfers
- Reduces the risk of strain or back injury for the carer
- Belt is firmly secured by an adjustable nylon buckle
- Slip resistant material to prevent belt from sliding up clients clothing
- Four large padded vertical handles assist the carer in supporting the client while walking
- Machine washable
- One universal size to suit chest or waist circumference 60-125cm

Patslide

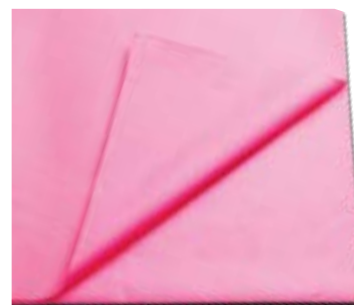

- Facilitates safe and easy patient transfers from bed to trolley etc
- Reduces the risk of back injury for the carer
- Handholes provide maximum grip for the carer
- Slip resistant pads increase stability during transfers
- Radio-lucent material construction is lightweight, highly impact tolerant and static insulative
- Not to be used as a lifting device

Code	Size	Width x Length (mm)	Weight
M8900	All Purpose	635 x 1530	4.5kg
M8905	Theatre	560 x 1530	4.0kg

Slide Sheet

- Nylon material to assist sliding and transferring patients
- Reduces the risk of strain or back injury to carer
- Slide sheet is folded over and placed under the patient, and top sheet is slid over the lower sheet
- Machine washable

Code	Size	Dimensions(m)
LC0080	Regular	1 x 1.5
LC0070	Large	2 x 1.5

Romedic WendyLett Base Sheet

- WendyLett base sheet is a satin sliding sheet that is intended for clients who have difficulties turning in bed
- A smooth, silky central part of the sheet enables the client to turn with minimal effort
- Anti-slip material on the sides of the sheet help prevent the client sliding off the side, or sliding down the bed
- For training videos and further information go to www.romedic.com
- Available in 4 sizes

Width	Length	Sliding Surface
100cm	200cm	60cm
200cm	200cm	70cm
140cm	200cm	60cm
200cm	90cm	60cm

Romedic WendyLett 2 Way Sheet

- The WendyLett 2 Way is a draw sheet to be combined with a WendyLett base sheet
- The combination of these two sheets make it easy for the staff to turn the client sideways in the direction of the stripes
- To use: Fold the edge of the draw sheet and fill your hand with fabric, creating a good, strong ergonomic grip. Working methodically, use

straight arms and lean or step backwards to create a sliding transfer sideways.

- Material also helps prevent client from sliding down the bed
- For training videos and further information go to www.romedic.com
- Available in 2 Widths, 100cm and 140cm Wide

Romedic WendyLett 4 Way Sheet

- The WendyLett 4 Way is a sliding draw sheet to be placed on top of a WendyLett base sheet
- The combination of these two draw sheets allows for multidirectional moves in bed
- Carers can see and understand the sheet's function by the distinct checked pattern, providing confidence in their work and saving time
- Procedures such as turning in bed, moving higher up/lower in bed or readjusting a user while lying becomes simple to achieve with this combination, even with the heavier or passive user
- The transfer is performed without risk of friction and shearing damage of the

skin of the user thus further preventing pressure-related sores

- WendyLett is made of a fine material which can be placed on top of a pressure-relieving mattress without compromising the pressure-relieving properties of the mattress
- The drawsheet is easily tucked into place under the mattress when no movement is required
- For training videos and further information go to www.romedic.com
- Available in 2 sizes, 100cm and 140cm wide

mobility

HF0050 Adventurer Walker

- Frame and backrest fold compact for storage and transportation

GC2190 i-Move Rounds Trolley

The low cost IT cart Compact rounds trolley height adjustable with shelf fully customisable top. The i-move is an affordable, gas assisted height adjustable rounds trolley. When it comes to moving laptops, tablets or simply pens and paper along with other clinical items, traditionally metal dressing trolleys have been used. The i-move is light and easy to move, unobtrusive in tight spaces and you can comfortably sit or stand at it. Included is a convenient storage shelf and our ability to customise the top size and shape to totally suit your requirements.

Features:

- Kensington computer lock
- Storage compartment
- Table mount
- Custom top size
- Power cord securing bracket
- Fully customisable top
- 75mm diameter twin wheel castors

Accessories Available:

- Compact, east to clean top
- Size: 550mm wide x 560mm deep
- Rebated to prevent items from sliding off
- Convenient 110mm storage shelf with lip
- Gas height adjustable from 810mm to 1110mm
